INTELLIGENT DIAGNOSTICS
AUTO VIN IDENTIFICATION

SMARTLINK C
SMARTLINK REMOTE DIAGNOSIS

WIDE VEHICLE COVERAGE
110+ MAKES

X-431 PRO 5 opens the era of dual diagnostic modes (local diagnosis and Smartlink remote diagnosis). It not only inherits the powerful diagnostic strength of PRO series and comes with multiple advantages, such as wide vehicle model coverage, numerous special functions, strong diagnostic functions, accurate diagnostic data and more, but also supports Smartlink remote diagnosis and request support from Smartlink B of the third-party diagnostic devices that support Launch's diagnostic tools, J2534 and specialized detection equipment, with features not limited to the diagnostic functions of the device under control.

The hardware of X-431 pro5 is greatly improved. It adopts the Android 10.0 system, a 2.0 GHz processor and a 1920x1200 IPS HD display screen, providing 4GB RAM memory and 64GB ROM storage and securing faster and more stable running. The product also comes with a bracket, making it more convenient to use. The device is surrounded by a protective soft rubber sleeve, with strong resistance to fall.

Mode 1: Used with LAUNCH's diagnostic equipment

- When used as a VCI device, it needs to be used with the "diagnosis" module of the PRO5 diagnostic tool in order to connect to the vehicle to be repaired to obtain the vehicle data and then transmit the vehicle data to the diagnostic tool via Bluetooth communication for analysis.
- Support diagnosis of passenger cars and commercial vehicles, depending on specifications

Mode 2: Used with a local J2534 tool

When the SmartLink C (maintenance side) is used with a computer that has the OEM diagnosis software installed, it can be used alone as a local J2534 tool to flash the vehicle ECU. (* It is necessary to install the corresponding J2534 tool of LAUNCH on the computer, which can be downloaded from its official website *)
